An Archaeology of Land Ownership demonstrates that the relationship between people and land in the past is first and foremost an analytical issue, and one that calls for clarification not only at the level of definition, but also methodological applicability. Bringing together an international roster of specialists, the essays in this volume call attention to the processes by which links to land are established, the various forms that such links take and how they can change through time, as ...Within archaeological studies, land tenure has been mainly studied from the viewpoint of ownership. A host of studies has argued about land ownership on the basis of the simple co-existence of artefacts on the landscape; other studies have tended to extrapolate land ownership from more indirect means.
