

Download Object Oriented Philosophy

An object is a technical term in modern philosophy often used in contrast to the term subject. A subject is an observer and an object is a thing observed. Speculative realism is a movement in contemporary Continental-inspired philosophy (also known as post-Continental philosophy) that defines itself loosely in its stance of metaphysical realism against the dominant forms of post-Kantian philosophy (or what it terms "correlationism"). Object Oriented is based on message passing, no classes or inheritance involved. "Object oriented" coined by Dr Alan Kay has been hijacked by C++, Java and Co, Dr Alan Kay made it clear that OO was messages, not classes.: It is the property of object-oriented systems that allows objects to be built from other objects & allows explicitly taking of commonality of objects when constructing new classes., Object Oriented Philosophy.
