Science. Amusement Park Physics Explores how the laws of physics play a role in the design of amusement park rides. Design a roller coaster, determine the outcome of bumper car collisions, and more. A ride at an amusement park moves the riders in a circle at a rate of 6.0 m/s. If the radius of the ride is 9.0 meters, what is the acceleration of the - 242025...Physics–June '06 [3] [OVER] 9 A 60-kilogram student jumps down from a laboratory counter. At the instant he lands on the floor his speed is 3 meters per second.®was written for upper level elementary, middle school teachers and their students to encourage them to see, feel and experience the science behind amusement park rides., Amusement Park Physics 11 Answers.
