As a website owner or web designer you have to take into consideration what are the most common screen resolutions for the intended target audience of the website to determine what web page width is suitable for the website. The display resolution or display modes of a digital television, computer monitor or display device is the number of distinct pixels in each dimension that can be displayed. Various computer display standards or display modes have been used in the history of the personal computer. They are often a combination of aspect ratio (specified as width-to-height ratio), display resolution (specified as the width and height in pixels), color depth (measured in bits per pixel), and refresh rate (expressed in hertz). The screen size and resolution comparison looks at common desktop and notebook screens as well as computer monitor standards for 4:3 and wide-screen displays., Common Computer Screen Resolution.
