FEMA 451B Topic 11 Notes Reinforced Concrete Structures 11 - 1 Instructional Material Complementing FEMA 451, Design Examples Design for Concrete Structures 11 - 1 Reliable structures, very precise drawings. CYPECAD was brought about to carry out the analysis and design of reinforced concrete and steel structures, subject to horizontal and vertical forces, for houses, buildings and civil work projects. Reinforced concrete (RC) (also called reinforced cement concrete or RCC) is a composite material in which concrete's relatively low tensile strength and ductility are counteracted by the inclusion of reinforcement having higher tensile strength or ductility. The presentation focuses on the seismic design of reinforced concrete structures using the 2015 NEHRP Recommended Seismic Provisions and its primary reference standards: ASCE 7-10 and ACI 318-14., Design Reinforced Concrete Structures.
