

# Download Direttiva 200695ce - Low Voltage

For the purposes of this Directive, 'electrical equipment' means any equipment designed for use with a voltage rating of between 50 and 1 000 V for alternating current and between 75 and 1 500 V for direct current, other than the equipment and phenomena listed in Annex II. Public consultation on the evaluation of the Low Voltage Directive 2014/35/EU - Please reply by 4 April 2019. About the Low Voltage Directive (LVD) The LVD covers health and safety risks on electrical equipment operating with an input or output voltage of between: 50 and 1000 V for alternating current; 75 and 1500 V for direct current. The Low Voltage Directive (LVD 2014/35/EU) outlines essential safety requirements for electrical equipment operating with a voltage of between 50 V and 1000 V for alternating current and 75V and 1500V for direct current. This Directive shall apply to electrical equipment designed for use with a voltage rating of between 50 and 1 000 V for alternating current and between 75 and 1 500 V for direct current, other than the equipment and phenomena listed in Annex II., Direttiva 200695ce - Low Voltage.
