

# Download Encyclopedia Of Marine Mammals

Marine mammals are aquatic mammals that rely on the ocean and other marine ecosystems for their existence. They include animals such as seals, whales, manatees, sea otters and polar bears. Dolphins, whales, sea otters and other marine mammals capture the imagination and demand the affections of people around the world. Many of these marine animals adhere to complex social systems and exhibit remarkable intelligence. This is the list of marine mammals found in Australian waters. It is a sub-list of the list of mammals of Australia. Conservation status listed follows the IUCN red list of threatened species (v. 2013.2; data current at 3 March 2014): ...Except for the monotremes (an egg-laying order of mammals comprising echidnas and the duck-billed platypus), all mammals are viviparous—they bear live young., Encyclopedia Of Marine Mammals.
