

Download Escaping From Reality Without Really Trying

It has been said that the definition of insanity is doing the same thing and expecting different results, and yet we engage in an unconscious fiction of predictability every day. We work in an uncertain world, and our main goal in pursuing agility is to confront the unknown, and in doing so, to master it. “The key to understanding the real cost of UBI is understanding the difference between the gross (or upfront) and net (or real) cost. Here’s a simple example: imagine a room with 15 people who want to set up a UBI for the room of \$2 per person. A group of six of us just did The Cellar. It was so much fun and even the briefing was great. The employees really get into and want you to have a great time. 100% going to do another room. In the CBC podcast series Escaping NXIVM, Vancouver's Sarah Edmondson shares her experience of leaving a self-help community that she now says is a cult., Escaping From Reality Without Really Trying.
