

Download Russian Natural Gas Availability Energy Environmental Programme

Natural gas production. 2017 was a bumper year for natural gas. Global natural gas production increased by 131 billion cubic metres (bcm), or 4%, almost double the 10-year average growth rate of 2.2% – the fastest rate since the immediate aftermath of the financial crisis. Natural gas supplies 22% of the energy used worldwide, and makes up nearly a quarter of electricity generation, as well as playing a crucial role as a feedstock for industry. Jonathan Stern, Distinguished Research Fellow of the Natural Gas Research Programme, founded the OIES Natural Gas Research Programme in 2003 and was its Director until October 2011 when he became its Chairman and a Senior Research Fellow, he became a Distinguished Fellow in October 2016. He is honorary professor at the Centre for Energy ... Presentation Title & Author ENG FRE RUS; 3. Opening remarks: 4. Workshop on the United Nations Framework Classification for Resources: 5. Activities and priorities of the Committee on Sustainable Energy and any matters for consideration by the Expert Group on Resource Classification, Russian Natural Gas Availability Energy Environmental Programme.
