

Download Section 45 2 Review System Skeletal System

The muscular system is responsible for the movement of the human body. Attached to the bones of the skeletal system are about 700 named muscles that make up roughly half of a person's body weight. Did you know that skeletal muscles are organized into tightly packed groups? This lesson identifies the connective tissue layers that organize...Skeletal dysplasias (also called osteochondrodysplasia) are a large, heterogeneous group of conditions involving the formation and growth of bone. Some skeletalThe nervous system of vertebrates (including humans) is divided into the central nervous system (CNS) and the peripheral nervous system (PNS). The (CNS) is the major division, and consists of the brain and the spinal cord. The spinal canal contains the spinal cord, while the cranial cavity contains the brain., Section 45 2 Review System Skeletal System.
