SUMO is an open source, highly portable, microscopic and continuous road traffic simulation package designed to handle large road networks. It allows for intermodal simulation including pedestrians and comes with a large set of tools for ...We make urban transportation better, all around the world. We provide world-class software tools that power mobility services for a better and more sustainable future for urban environments.From 30.000 feet. SUMO is the simulation itself; it is a microscopic, space-continuous, and time-discrete traffic flow simulation. Purpose: Simulates a defined scenario, Simulation Of Urban Mobility.
